

Help Keep Our Residents Safe From COVID-19

A message from Embassy Healthcare

Dear Residents, Families, Friends, and Volunteers:

We are committed to keeping our residents safe and we need your help. The virus causing Coronavirus Disease 2019 (abbreviated COVID-19) can cause outbreaks in nursing homes. Many of our residents are elderly and may have medical conditions putting them at risk of becoming sick or severely ill with COVID-19. Visitors and healthcare personnel (HCP) are the most likely sources of introduction of the virus that causes COVID-19 into a facility.

To protect our vulnerable residents, even before COVID-19 is seen in our community, we are immediately taking the following actions to reduce the risk of COVID-19 in our residents and staff:

- 1. Effective immediately: We are restricting all visitation until the Governor's Orders are lifted.**
All visitation is being restricted (in accordance with Governor DeWine's order) except for the end of life situations. These visitors will first be screened for fever and respiratory symptoms, before being allowed entry. We know that your presence is important for your loved one but, per guidance from the Centers for Disease Control and Prevention (CDC), this is a necessary action to protect their health.
 - We are introducing alternative methods of visitation (such as Skype and Face Time) so that you can continue to communicate with your loved ones.
 - Visitors who are permitted to enter the building will be required to frequently clean their hands, limit their visit to a designated area within the building, and wear a facemask. As the situation with COVID-19 is rapidly changing, we will continue to keep you updated.
- 2. We are monitoring healthcare personnel and residents for symptoms of respiratory illness.**
Healthcare personnel will be actively monitored for fever and symptoms of respiratory infection. Ill healthcare personnel will be asked to stay home. You may see healthcare personnel wearing facemasks, eye protection, gown, and gloves to prevent germs from spreading and help keep residents safe. Healthcare personnel will clean their hands frequently.

We are assessing residents daily for fevers and symptoms of respiratory infection to quickly identify ill residents and implement additional infection prevention activities. When ill residents are identified, they will be monitored closely, asked to stay in their rooms or wear a mask.

- 3. We are limiting activities within the facility.**
We are canceling all group activities within the building, community outings and communal meals. We will be helping residents to practice social distancing and frequently cleaning their hands.

We encourage you to review the CDC website for information about COVID-19, including its symptoms, how it spreads, and actions you can take to protect your health: <https://www.cdc.gov/coronavirus/2019-ncov/index.html>.

Thank you very much for everything you are doing to keep our residents and facility staff safe and healthy. We continue to monitor the situation in our community; we will keep you informed about any new precautions we think are necessary to keep your loved one safe.

Please contact your Center with any additional questions.

Sincerely,

Embassy Healthcare
